

FLUSH WITH OPPORTUNITIES

Good companies get 30%-50% of their hires through employee referrals.

Although sometimes considered a dirty word by those who think of networking as using people to get ahead, networking has taken on a whole new meaning in today's ultra-competitive market, where there are too few jobs for too many qualified candidates. In order to sift through hundreds of resumes, many companies have turned to hiring via referral.

How to be a better listener:

Use Body Language

- If you're listening to someone seated next to you, push your chair back slightly and angle your body toward the person.
- Cocking your head slightly as you look at the speaker also indicates you're listening intently.
- Keep your arms relaxed instead of crossing them in front of your body.
